Diamond Center Plus 5 VTM

A Value Transfer Machine That Allows a User to Add Value to or Purchase a SmartCard using a Credit Card, Debit Card, Pin-based Debit Card, EBT Card, or Mobile Pay.

The Diamond Center 5 Plus VTM is designed to add value to a SmartCard by offering the customer many payment options. First, a customer will insert their Smart Card, next a credit or debit card can be swiped using the built-in terminal. The desired value to be transferred from the credit or debit card to the Smart Card is entered on the pin pad and the transfer is completed. There is a user friendly interface to assist the customer in engaging all the features offered on this VTM. Because the Diamond Center 5 Plus is equipped with an encrypted pin pad it will allow the acceptance of pin based debit cards and Electronic Benefits Transfer (EBT) cards. The Diamond Center 5 Plus is ready to accept NFC devices like Apple Pay, Samsung Pay, and Android Pay. The Diamond Center 5 Plus will dispense Smart Cards when purchased with any of the methods listed to transfer value and it can function as a Coded Value Adder using generated codes.

Diamond Center Plus 5 What makes it different ?

The Diamond Center Plus 5 is totally dependent on the Internet. Unlike the other ESD Diamond Center models, it has no internal computer, it does not use an external credit card swipe. The Pax SP30 encrypted pin pad does the work of each of the components found in older model VTM's. This makes this VTM simple to operate and economical to purchase.
