ESD CardSlide Units  
*A CardSlide for every application*

**CSU**

For Card Operated Laundry, Route, Multi-housing and Vending Applications

# ESD CardSlides: Sturdy, Reliable, Proven; Applications To Fit Any Machine In The Laundry Industry

The ESD CardSlide is designed to mount on and operate any washer, dryer, tumbler, or extractor presently used in the laundry industry. Whether mechanical or electronic, top load or 80 lb front load washer, small dryer or stack tumbler, ESD has a cardslide to fit your needs.

ESD CardSlides are constructed with a large, bright LED display mounted in an attractive, secure housing. The sophisticated ESD internal processor features an anti-tearing algorithm to prevent card corruption; it can offer time of day and day or day of the week specials and the built-in memory can collect and store all revenue and transactional data. The electronic components are protected from moisture damage with a special conformal coating.

# THE RIGHT CSU FOR EVERY APPLICATION

## THE RUBY –

The Ruby is designed so that it will fit into a coin slide opening, a coin drop opening, or the moneybox area of any washer or dryer. The installation of an ESD

CardSlide is fast and simple, and the result produces a perfect, trouble free mating with any machine.

American Dryer  
Continental Girbau  
GE  
Heusch  
Inglis  
Maytag  
Speed Queen  
Vend Rite  
Wascomat  
Whirlpool

## THE VERTICAL RUBY –

This vertical orientation CardSlide has all of the same features as the Basic Ruby, except that its design allows it to be mounted vertically. ESD builds adapter plates that make it possible to give a professional fit and finish to every installation.

American Dryer  
Cissell  
Dexter  
Ipsco  
Maytag

## THE NETWORK READER -

Using the Ruby CardSlide as a platform, ESD's modular construction allows auxiliary electronic components to be added that will economically convert the basic Ruby into a model with full networking capability. Available from the factory or as an upgrade conversion, the network CardSlide will perform all of the functions of the Ruby.

In addition, it will allow remote access and interaction between the washers and dryers and the VTM to your home PC.

## THE DOOR ACCESS CONTROLLER –

ESD offers a complete keyless entry system that can be used in conjunction with a MoneyCard Payment System. When coupled with special software, there are many special features available such as unique entry tracking and lock out "hot list".

## THE UTILITY CONTROLLER –

This CardSlide is used for controlling countless devices such as PC access, tanning beds, parking gate controls, etc. Please contact ESD for specifications.
